Background includes technical education, project leadership, research systems, civic software, and practical local systems.

Core Skills

Frontend	React, Next.js, TypeScript, React Native, Redux, Tailwind CSS
Backend	Node.js, Express, API development, MongoDB, SQL, Socket.IO, BullMQ
Platform	Kotlin Multiplatform, Android, C#/.NET, Python, Docker, MQTT
Leadership	Agile and waterfall methods, SDLC, mentoring, estimates, troubleshooting

Experience

Senior Full Stack Developer - Epilogue

Aug 2021 - Present | Toronto, Ontario, Canada - Remote

- Senior product engineering work across modern full-stack surfaces, with React and Next.js highlighted on LinkedIn.
- Apply TypeScript, React, Next.js, API development, and database experience to practical product work.

Lead Full-stack Developer - Tidal

Apr 2021 - Jul 2021 | Richmond Hill, Ontario, Canada

- Led front-end development, upkeep, and management of corporate web applications across multiple industries.
- Worked with major retail brands on worldwide Shopify stores across front-end and back-end maintenance.

Professor, Computer Programming and Project Management - Durham College

May 2018 - Apr 2021 | Oshawa, Ontario, Canada

- Developed and taught web development, Windows application development, modern JavaScript, and project management courses.
- Mentored students and alumni on software development choices for early-stage businesses.

Freelancer - Austin Garrod

May 2017 - Apr 2021 | Ontario, Canada

- Designed branded web presences, CMS implementations, and social media presences for organizations.
- Built web experiences with React, Meteor, and established web standards.

Research Specialist - Durham College, ORSIE

Aug 2016 - Apr 2017 | Oshawa, Ontario, Canada

- Worked on applied research systems including React/Node vehicle analytics, iOS item tracking, and responsive Meteor applications.
- Reworked a Meteor web app to improve accessibility across devices for senior users.

Selected Projects

- Open Design - public TypeScript-heavy agentic design workspace with web, desktop, plugin, and export surfaces.
- Cadence - private Kotlin Multiplatform podcast app with local-first state, opt-out diagnostics, and Pocket Casts import support.
- Spools - local web app for 3D printer filament tracking with Bambu Lab AMS sync over MQTT.
- Charity Data Scraper - queue-based Canadian charity data scraper with Redis/BullMQ, MongoDB, WebSocket progress, and Docker deployment.
- Kids TV Controller - household NFC media controller concept with React dashboard, Express API, Plex/Chromecast integration, and ESP32 hardware planning.

Education and Certifications

Durham College - Diploma, Computer Programming/Programmer, General, 2016 - 2017.

PMI Certified Associate in Project Management (CAPM), issued Apr 2018. LinkedIn lists expiry Apr 2026; renewal status not claimed on this resume.
