Austin Garrod

Lead Developer | Ontario, Canada | austin.r.garrod@gmail.com | austingarrod.ca | GitHub | LinkedIn

Lead Developer at Epilogue, based in Ontario. I combine hands-on development with architecture decisions across React, TypeScript, Node.js, APIs, and data systems. My background in teaching and applied research shapes how I work: explain decisions clearly, test what matters, and make software easier for the next person to maintain.

Core Skills

Frontend	React, Next.js, TypeScript, React Native, Redux, Accessibility
Backend	Node.js, Express, MongoDB, SQL, Redis, REST APIs
Platform	Kotlin, Android, C#/.NET, Python, Docker, MQTT
Practice	Technical leadership, Architecture, Code review, CI/CD, Documentation, Mentorship

Experience

Lead Developer - Epilogue

Aug 2026 - Present | Permanent full-time | Remote - Ontario, Canada

Joined as an Intermediate Full Stack Developer in Aug 2021; promoted to Senior Full Stack Developer in Aug 2024 after taking the lead on charity-partner development.

- Build and maintain React and TypeScript interfaces, Node.js and Express services, and MongoDB-backed APIs for charity partners and internal teams.

- Design access boundaries, analytics, and scheduled AWS reporting to keep partner data scoped and operational information useful.

Lead Full-stack Developer - Tidal

Apr 2021 - Jul 2021 | Permanent full-time | Richmond Hill, Ontario, Canada

- Maintained Shopify storefronts for retail clients across front-end and back-end work.

- Coordinated external and internal developers to deliver customer and internal software projects.

Professor, Computer Programming and Project Management - Durham College

May 2018 - Apr 2021 | Oshawa, Ontario, Canada

- Mentored students and alumni on software development choices for early-stage businesses.

- Created and maintained online course material focused on practical programming and SDLC fundamentals.

Freelancer - Austin Garrod

May 2017 - Apr 2021 | Freelance; concurrent with teaching from May 2018 | Ontario, Canada

- Built web experiences with React, Meteor, and established web standards.

- Implemented and maintained distributed CMS installations and custom content-management tools.

Research Specialist - Durham College, ORSIE

Aug 2016 - Apr 2017 | Oshawa, Ontario, Canada

- Contributed to a vehicle analytics web application for dealership communication workflows.

- Designed and helped develop an iOS application for item-tracking workflows.

Selected Projects

- Honour Our Veterans Banner Platform - Connected web, API, and mobile surfaces around a shared civic project model.

- Cadence - Account-free, local-first listening covers queues, playlists, bookmarks, history, downloads, and flexible playback.

- Spools - Separates machine-synced AMS state from manually corrected inventory data.

- Charity Data Scraper - Redis-backed job state supports pause/resume control, retries, and rate-limited collection.

- AustinGarrod.ca - Static output plus PHP contact handling keeps production compatible with basic shared hosting.

Education

Durham College - Diploma, Computer Programming/Programmer, General, 2016 - 2017. Foundation in programming logic, object-oriented development, databases, networking, web development, testing, systems development, and technical communication.
